Gholdigrui. Hooghly

About of the Seminar

'Save water to save life on earth', this rule has become the prime need for all of us now. We all know that water is as essential as air to live on earth but the worst part is that fresh water has been declining day by day. Due to lack of water many natural crises are happening in world like drought, different diseases, environmental pollution and the global warming, still a major part of world population is not understanding the importance of water saving.
